

```
classDiagram
    Thread <|-- CANCommunication
    Thread <|-- ConduccionThread
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Thread'. Below it, a horizontal line connects two boxes: 'CANCommunication' on the left and 'ConduccionThread' on the right. A vertical line with an upward-pointing arrow originates from the center of this horizontal line and points to the bottom center of the 'Thread' box, indicating that both 'CANCommunication' and 'ConduccionThread' inherit from 'Thread'.
